

Full Time Automotive Technology Teaching Position
FCPS Career & Technology Center

Start Date: August 15, 2016

**Required
Qualifications:**

Knowledge of automotive technology skills required of an auto technician including the principles and practices of the auto industry and positive employability skills required of the industry. Five (5) years of experience working in the automotive industry, ASE Auto Technician certification. Ability to work in partnership with other instructors.

Duties:

The Automotive Technology Instructor is responsible for teaching high schools students the theory and performance skills in a variety of Automotive Technology courses, to include, but not to limit to, Electrical, Brakes, Suspension and Steering, and Engine Performance in alignment with the Maryland CTE Frameworks, NATEF standards, and ASE certification requirements. This position requires the development of lessons which incorporate safety protocols and positive employability skills and those additionally represented via the SkillsUSA organization.

Salary:

Teaching contract with full benefits. Salary based on education and experience.
